Profile Summary

Software Engineering undergraduate with a strong foundation in programming and full-stack development. Experienced in building scalable web applications using Java, React, Node.js, and RESTful APIs through academic and personal projects. Familiar with machine learning concepts and algorithm design, and experienced in deploying applications using platforms such as Vercel and Render with DevOps-oriented practices. Proficient in database design, clean code practices, and Agile SDLC methodologies. A fast learner and collaborative team player with strong problem-solving skills, seeking a Software Engineering Intern position to gain hands-on industry experience and contribute to real-world projects.

Core Competencies

Full-Stack Development

- JavaScript, TypeScript, Java, Python
- React.js, Next.js, Node.js, Express.js
- Tailwind CSS

Database Management

- Firebase, MySQL, MongoDB

ML & Algorithms

- Machine Learning (Regression, Classification, Clustering)
- Data preprocessing, model evaluation

Project Management & Collaboration

- Jira

Cloud

- AWS (EC2, S3, IAM)

Automation Tools

- Selenium, JMeter

Development Practices

- Agile, Scrum, SDLC

Version Control

- Git, GitHub

Education

BSc (Hons) in Software Engineering (Current GPA – 3.96)

Sep – 2022

CINEC Maritime Campus, Malabe.

(Advanced Data Structures and Algorithms, Object Oriented Concepts & Programming, Mobile Computing, Advanced Web Technologies)

Certifications

AI/ML Engineer – Stage 1

Faculty of computing | SLIIT UNI

OCT - 2025

HackBlast 2024

IEEE Student Branch CINEC | Hackathon Competition

March - 2024

Projects

Techstrike Club Official Website

Sep – 2025 (completed)

- Developed a full-featured web application using React.js, Node.js, MongoDB, and Tailwind CSS.
- Implemented User Management and CRUD operations for events and participants.
- Built Admin Dashboard for managing users, events, and analytics.
- Deployed the application on Vercel and Render for live access.

Chill Grand Restaurant Management System

Nov – 2025 (Ongoing)

- Developed a POS system & official website including QR-based ordering, update live menu using React.js, Node.js, Python, PostgreSQL, and CSS.
- Develop Machine Learning models for bill verification, menu prediction, and inventory updates.

Easy Auto vehicle selling and buying mobile application

Nov – 2025 (Ongoing)

- Developed a mobile application for vehicle management, service booking, and user tracking using React Native, Node.js, PostgreSQL, and REST APIs for cross-platform mobile development.
- Implemented image upload/storage using AWS S3 and integrated PayHere payment gateway for secure payments.

Learning Management System (LMS)

Jan – 2026 (Ongoing)

- Designed and developed using Java Spring Boot with Firebase as the database.
- Implemented CRUD operations for courses, assignments, and user profiles.
- Implemented email notifications for assignment deadlines, announcements using JavaMailSender.

Experiences

- Held the position of Director at Techstrike Club, Cinec Campus (2025–2026).
- Held the position of Web Development & IOT head at Techstrike Club, Cinec Campus (2024–2025).
